EDUCATION

Arizona State University

Master of Science in Computer Science

Bachelor of Science in Computer Science

Aug. 2021 - Dec. 2025

GPA: 3.62/4.00

GPA: 3.88/4.00

EXPERIENCE

Mobile App Developer Intern

Stanford Health Care

Jun. 2025 - Aug. 2025

Palo Alto, CA

- Delivered new features and bug fixes to the MyHealth mobile apps by completing **13 Jira tickets** for **Android (Java)** and **8** for **iOS (Swift)**, leading to releases on the **App Store & Play Store**
- Built **patient appointment, insurance, messaging, 2FA**, and **scheduling** features with **cross-functional teams**, improving healthcare accessibility and patient outcomes

Full Stack Developer

Ira A. Fulton Schools of Engineering

May 2024 - Dec. 2024

Tempe, AZ

- Developed a [capstone showcase website](#) for **350** engineering students to submit and present capstone projects to their peers, industry sponsors, and faculty members
- Created the **frontend** architecture, including a home page, navigation menu, and survey form, using **React**, **TypeScript**, and **CSS**, improving usability and engagement for viewers
- Implemented **backend** services, connected a **GoDaddy**-hosted **MySQL** database using **Express**, and handled project submissions while maintaining a scalable system

Software Engineer Intern

Cognizant

Jun. 2024 - Aug. 2024

Mesa, AZ

- Utilized **HTML**, **CSS**, **JavaScript**, and **Bootstrap** classes to improve features and enhance designs of final test builds for the Trizetto Healthcare Products web pages
- Resolved over **80%** of all critical accessibility issues, low contrast errors, and alerts with **HTML** and **CSS**, ensuring the website followed the Americans with Disabilities Act standards

Frontend Developer

Develop For Good

Oct. 2023 - Feb. 2024

Remote

- Enhanced the **Thought Cloud** feature for 12 books using **Sass** and **CSS**, enabling readers to submit answers, track their understanding, and improve reading comprehension
- Optimized the visual layout, achieving **75% higher user approval** through better text sizing, reduced whitespace, and updated questions with larger fonts, containers, and icons

TECHNICAL SKILLS

Languages: Java, C, C++, C#, Python, HTML, CSS, Sass, JavaScript, TypeScript, SQL, R, MATLAB

Frameworks: NodeJS, ExpressJS, ReactJS, Tailwind, Django, Flask, MongoDB, PostgreSQL, MySQL, .NET

Tools: Windows, Linux, Unix, Bitbucket, Jupyter Notebook, Git, Docker, Kubernetes, ROS, Jira, Agile, Scrum

PROJECTS

[Semantic Book Recommender](#) | Jupyter Notebook, Python, LangChain, Gradio

- Developed a book recommendation system using machine learning, semantic search, and sentiment analysis

[AI Newsletter SaaS](#) | TypeScript, NextJS, Supabase, OpenAI, Tailwind

- Created an automated platform delivering personalized newsletters tailored to individual user preferences

[DevOps Production API](#) | JavaScript, Express, Node, Docker, GitHub Actions

- Built a secure Node.js API with JWT authentication, Arcjet rate limiting, and automated Docker CI/CD pipelines

[Snake](#) | Python, Pygame, PyTorch, Matplotlib

- Trained a neural network reinforcement learning model to play Snake, analyzing performance vs average scores

[E-Commerce Website](#) | HTML, CSS, JavaScript, React

- Developed an online shopping platform featuring interactive elements, clothing products, and seamless navigation

[Movie App](#) | Node, Express, MongoDB

- Built a movie discovery website with efficient search functionality and dynamic poster displays for exploration
